**Car Restraint  
Hire for Premature  
and Low Birth  
Weight Babies**

## Safe travel in the car for your smallest passenger

Our premature and low birth weight babies are often discharged from hospital when they are still very small and they generally don't fit well in standard car seats and carriers. It is important that they are restrained appropriately in the car for safe travel.

To help our low birth weight and premature babies travel safely in the car, Kidsafe SA has the **Britax Unity Carrier Isofix** available for short-term or long-term hire. It is currently Australia's only baby capsule suitable for low birth weight and premature infants. You can hire one from Kidsafe SA to use for the first few months of your baby's life until they are big enough to be safely restrained in a standard car seat.

## Correct harness fitment is important!

### Britax Unity Carrier Isofix

#### ✓ Correct Fitment

- Harness positioned level with shoulders
- Harness close to hips
- Crotch buckle supporting pelvis
- Firm harness fitment

### Standard Infant Restraint

#### ✗ Incorrect Fitment

- Shoulder harness too high
- Harness not close to hips
- Crotch buckle too high
- Loose harness fitment

Kidsafe SA can provide hire, sales and fitment of the **Britax Unity Carrier Isofix**.

## Hire

With flexible hire terms and free fitting and adjustment on any hire, we can help you take your baby home safely when discharged from hospital.

## Sales

If you would prefer to purchase your own brand new carrier, Kidsafe SA also sell the **Britax Unity Carrier Isofix**. Free fitting and adjustment is included with the purchase of any seat or carrier.
